Special Dutch Bulb Offer

COTTAGE TULIPS, PICOTEE, IN BLOOM DURING MAY

Note the graceful shape of the flower. The color is even more beautiful. Pure white, the edge of the petals is margined rose-pink. As the flower ages, this beautiful tone of pink gradually suffuses the entire bloom. Planted in clumps of 25 bulbs each throughout your garden borders or in a bed in mass, the effect will in either case be beautiful. Bulbs prepaid to your home, 50 cts. per dozen, \$3.50 per 100.

Plant Dutch Bulbs in Your Garden this Fall and Help Keep America Beautiful

We believe every American is in sympathy with the aims and objects set forth by President Wilson.

In order to accomplish these objects, it is necessary that we maintain good health, both physical and mental. The growing of Flowers will help us in doing this.

The writer of this Special offer of Dutch Bulbs for Autumn Planting has just had the privilege of visiting a Fall Flower Show, held in a Long Island village made famous as the home of one of our distinguished Ex-Presidents.

A wonderful display of Dahlias in their many interesting forms and gorgeous colorings. Several well staged exhibits of Annual and Perennial Flowers and many exhibits of Vegetables and Fruits, all of excellent quality, tastefully arranged.

Notwithstanding the shortage of labor these men have endeavored to grow Flowers as well as Vegetables.

Keep the Home Flowers Blooming—Plant a few Daffodils or Hyacinths in your garden this Fall for April blooming. A few clumps or formal beds of the Darwin or Cottage Tulips for May blooming, to succeed the Daffodil and Hyacinth. Spanish and English Iris for June flowering.

Write today and we will ship promptly. November is the best month to plant any of the bulbs offered in this list.

NEW YORK CITY

GIANT DARWIN TULIPS, May-Flowering

The Tulips of Milady's Garden

When Milady on a brilliant May morning surveys her garden border planted in clumps of Darwin and Cottage Tulips, the blooms as large as the giant Cattleya orchids, the petals as thick and as massive as the water-lily, glittering and glistening in the sunlight, she will be tempted to say that these Tulips are indeed the Queens of the Spring Garden. Whether you delight in having flowers with 2- to 3-foot stems for cutting, masses of color against the background of shrubs, planted in clumps of ten or twenty-five each in the herbaceous border, or in various-shaped beds on the lawn, few other Tulips will provide such a wonderful display.

Culture.—Bulbs should be planted 5 to 6 inches deep and not less than 5 inches apart. Sand to the depth of $\frac{1}{2}$ inch at the base of the bulbs will amply repay the trouble by the provision for drainage during wet weather. For forcing, bulbs should be planted as soon as received, and the flowers appear to better advantage if pots a trifle deeper than the ordinary bulb-pans are used. We recommend what are termed azalea-pots for this purpose. A temperature of 55 to 60 degrees is recommended, as if allowed to "come gently," larger flowers and longer stems may be had.

TEN FINE DARWIN TULIPS

PREPAID TO YOUR HOME

Baronne de la Tonnaye.

A long and beautiful flower; clear carmine-rose at the midrib, toning off to soft pink at the edges, the inside of the white base, delicately tinged blue. Of wonderful size and proportion, borne on stems 26 inches long.

50 cts. per doz., \$3.50 per 100.

Clara Butt.

Beautiful clear salmon-pink. No other variety offered by us has the same distinctive and pleasing color. A bed of this variety makes a grand sight. Of excellent substance and borne on stems 22 inches long.

45 cts. per doz., \$3.25 per 100.

Dream.

A color unlike any seen in the early Tulips; a uniform mauve shade, of large size and handsome form. Splendid for contrasting with pink and white Clara Butt and White Queen. The flowers are borne on stems 24 inches long.

60 cts. per doz., \$4.00 per 100.

Europe.

Deep, fiery crimson, with white base. There is no more beautiful sight than a bed of this variety. The stems are of medium length, the flowers large and erect, the white base contrasting well when the flower opens. Height 20 inches.

60 cts. per doz., \$4.00 per 100.

Glow.

The deepest shade of crimson-scarlet; a color of wonderful brilliance, not unlike that of the Oriental poppy. The flowers are of large size borne on stems 20 inches long.

60 cts. per doz., \$4.00 per 100.

Margaret.

Pale rose, center white, delicately marked blue, a very delicate and pleasing color. The flowers are globular in shape, of stately habit and borne on stems 22 inches long.

40 cts. per doz., \$3.00 per 100.

Mrs. Potter Palmer.

A distinct dark violet; flowers of wonderful substance and size. The foliage is of a deep green color; the stems frequently attain the height of 28 inches.

60 cts. per doz., \$4.50 per 100.

Pride of Haarlem.

Magnificently formed flower of immense size, of a brilliant, deep rose, shaded scarlet, with light blue base. This variety, perhaps the most widely known for its stately habit and glorious color, is unsurpassed for border planting or beds, sometimes attaining the height of 3 feet.

45 cts. per doz., \$3.25 per 100.

The Sultan.

Rich maroon-black; a flower of attractive and distinctive coloring, approaching in color the Black Tulip of the romancer's fame. An exquisite flower of refined form and habit, growing to the height of 25 inches.

40 cts. per doz., \$3.00 per 100.

White Queen.

A splendid white variety; when first opening pale rose but quickly turns white—a truly exquisite color.

50 cts. per doz., \$3.50 per 100.

DARWIN TULIPS—(1) Europe, (2) Pride of Haarlem, (3) Clara Butt

Old English COTTAGE TULIPS

MAY-FLOWERING

Cottage Tulips somewhat resemble the Darwins in length of stems and time of blooming and, while not so robust growers, are much prized for cut-flowers for the drawing room or dinner-table. Their pale and lovely colors are exquisite, and all the varieties offered are deliciously sweet-scented. The same cultural directions as recommended for Darwin Tulips on preceding page is suggested for Cottage Tulips.

TEN FINE COTTAGE TULIPS **PREPAID TO YOUR HOME**

Bouton d'Or. Rich chrome-yellow, with thick, broad petals, and black anthers. The shape of this Tulip resembles the Darwin varieties and, on account of its color, should be in every collection. The flower is borne on a straight, stout stem, frequently 20 inches tall. **45 cts. per doz., \$3.25 per 100.**

Caledonia. Deep orange-scarlet; a very brilliant variety for bedding. The flowers are not large, but the color is striking when grown in masses. Rather dwarf in habit, usually growing about 17 inches high. **45 cts. per doz., \$3.25 per 100.**

Fairy Queen. The color of this variety is distinct and of a very charming and exquisite tone. The main portion of the petals is of a unique rosy lilac, while the edge is broadly margined amber. The contrast is pleasing and unique. The flowers are borne on strong stems 20 inches long. **45 cts. per doz., \$3.25 per 100.**

Gesneriana Major. Scarlet of wonderful brilliancy, with a deep, rich blue-black base, contrasting with the dazzling color of the flower; exquisite, reflexing form, borne on a stiff stem 18 inches long. Wonderful bedding variety. **45 cts. per doz., \$3.25 per 100.**

Gesneriana Lutea. A yellow variety of quite a different shape than the first one mentioned in our list. The flowers are pure golden yellow, true cottage shape, very reflexing and borne on strong robust stems, 24 inches long. **50 cts. per doz., \$3.50 per 100.**

Golden Crown. Pale yellow, edged crimson; as the flower ages, it turns a beautiful shade of orange-red. Excellent bedding variety, growing 16 inches high. **45 cts. per doz., \$3.25 per 100.**

Inglescombe Pink. Beautiful, gobular-shaped Tulip of unique, bronzy old-rose; a very decorative variety, borne on stems 22 inches long. **45 cts. per doz., \$3.25 per 100.**

La Candeur. A splendid white variety, which is slightly tinted pink. A flower of very lovely shape, the petals slightly reflexed, borne on stems 18 inches tall. **45 cts. per doz., \$3.25 per 100.**

La Merveille. A very exquisitely shaped and delicately sweet-scented Tulip of deep salmon-rose tone, growing 20 inches tall. **40 cts. per doz., \$3.00 per 100.**

Picotee. White, margined deep rose, the color gently suffusing the flower as it ages. A very beautiful variety, the flower reflexing. The sight of a bed planted wholly to this variety is one of great beauty. The flowers are held on erect stems 20 inches long. **50 cts. per doz., \$3.50 per 100.**

COTTAGE TULIPS—(1) Inglescombe Pink, (2) Bouton d'Or, (3) Gesneriana Spatulata or Major, (4) Picotee

DAFFODILS

Few bulbous flowers are more graceful than the Daffodils. While they do not possess the gorgeous colorings of the Darwin and Cottage Tulips, the fact that they come to bloom during April and precede the Tulips suggest their use.

The charm of the Daffodil is seen to excellent advantage when planted in clumps in the herbaceous or garden border. All of the varieties offered in this list are excellent for naturalizing in the lawn under trees and along banks of streams. They may also be grown indoors in pots for cutting during February or March.

Culture.—Owing to the various sizes of the bulbs, it is not advisable to state the exact depth to plant, but the simple rule of covering the bulb one and a half times its own depth, and making the distance between the bulbs 3 to 4 inches for the smaller sorts and 5 to 6 inches for the larger ones, is a good one. For greenhouse or window-garden culture treat them the same as hyacinths, except that three or more bulbs of one variety should be planted in a pot, and not single specimens.

SIX SELECT SORTS

(PREPAID TO YOUR HOME)

Barrii Conspicuus. A flower of excellent shape and dainty appearance. The perianth, or wings, are broad and spreading and of a soft uniform yellow, while the cup is yellow, with a vivid scarlet margin. Excellent for culture in garden or pots, growing about 21 inches high. 35 cts. per doz., \$2.50 per 100, \$22.00 per 1000.

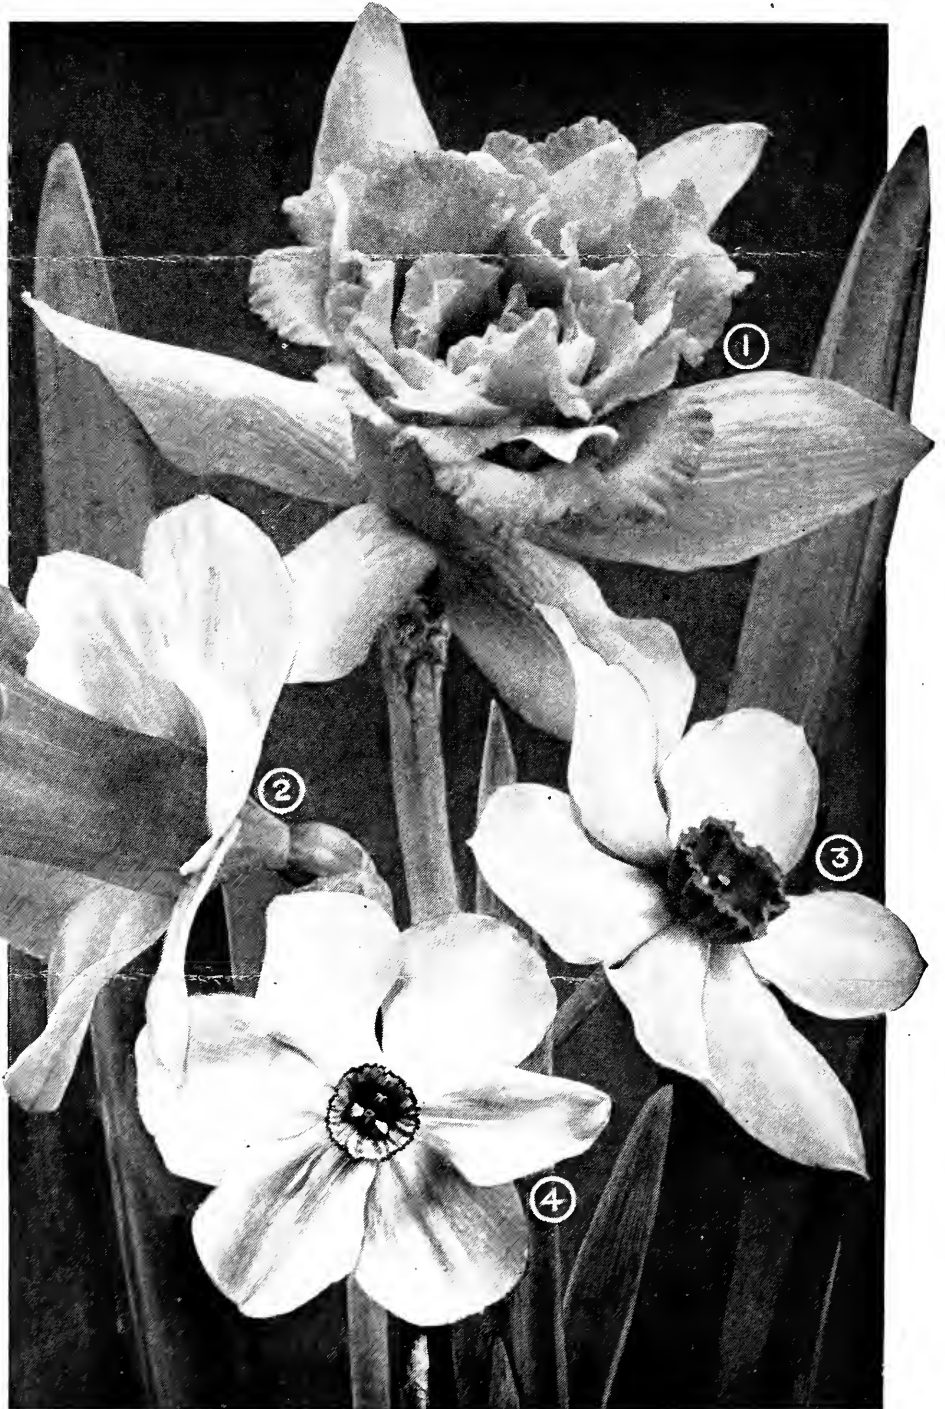

Emperor. A giant Trumpet variety of massive and durable substance. The perianth, or wings, are primrose-yellow, and the trumpet of a trifle deeper shade. Grand for pot or garden culture, growing 18 inches high. 60 cts. per doz., \$4.50 per 100, \$40.00 per 1000.

Poeticus ornatus. The petals of this type of Narcissus are pure white, and the cup is almost flat and of a deep yellow tone, edged rosy scarlet. Excellent for pot or garden culture, growing 15 inches high. 50 cts. per doz., \$3.00 per 100, \$28.00 per 1000.

Sir Watkin. The perianth, or wings of this variety are of a primrose-yellow, and the cup is large and well formed, of deep yellow. A grand flower of wonderful substance for garden culture or pots, growing 21 inches high. 45 cts. per doz., \$3.50 per 100, \$32.00 per 1000.

Victoria. The perianth, or wings, of this beautiful giant Trumpet sort are of a pale lemon-white color, and the trumpet is of a deep yellow, making an exquisite contrast. The flower is of wonderful proportion and substance, borne on a strong stem 20 inches high. 60 cts. per doz., \$4.50 per 100, \$40.00 per 1000.

Von Sion. The double-flowering Daffodil so frequently seen in the florists' shops in early March. Excellent for pot culture, and, where given a position in the garden not exposed too much to winds, does well. 75 cts. per doz., \$5.00 per 100, \$45.00 per 1000.

DAFFODILS—(1) Von Sion, (2) Victoria, (3) Conspicuus (Barrii), (4) Poeticus ornatus

BEAUTIFUL BULBOUS IRISES

PREPAID TO
YOUR HOME

Few flowers are equal in merit to the Iris, in its many forms and and gorgeous colorings.

The Irises mentioned on this page are grown from bulbs just like the Daffodil or Tulip. The Spanish Iris in this latitude flowers during early June, and the English, late June. Bulbs do best if planted in November, and also are better if protected with a slight covering during Winter.

NEW SPANISH IRIS (*Iris Hispanica*)

Selected Mother Bulbs for Forcing or Planting Out

These exquisite and dainty flowers may be justly termed the "poor man's orchid," as the colorings and markings are scarcely surpassed by that noble genus. The flowers are exceedingly graceful, of large size, frequently 4 to 5 inches across, and are borne on stems 24 inches tall.

Few, if any, of the Irises lend themselves to more artistic arrangements as a cut-flower for the drawing-room or dinner-table.

They may be planted in pots and stored in coldframes over Winter, and forced into bloom during March. They are seen to the best advantage if arranged in masses of the different colors, all of which combine splendidly, in borders or beds. Plant bulbs 3 to 4 inches deep, and the same distance apart. Sharp builders' sand, to the depth of 1 inch beneath base of the bulbs, will amply repay by more luxurious spikes and larger flowers. A situation well open to the sun suits them best, and, like all bulbous Irises offered, a slight mulch will prove beneficial during the Winter.

Beauty. A beautiful shade of pale lavender-blue; large flower; fine tall grower.

Belle Chinoise. A splendid early-flowering yellow; largely used for pot culture on account of its earliness.

British Queen. An excellent white variety; used also for pot culture on account of its earliness.

Bronze Queen. A beautiful shade of terra cotta; large; fine tall grower. 40 cts. per doz., \$2.50 per 100, \$20.00 per 1000.

Cajanus. A bright shade of sunny yellow; a splendid tall grower; the best of its color for outdoors.

King of the Blues. A splendid shade of deep dark blue; large flower and strong tall grower.

King of the Whites. A splendid tall-growing white variety.

La Nuit. A very deep, dark shade of blue; a splendid large tall grower.

L'Unique. Light blue, with white falls and golden yellow blotch; a very lovely variety and a tall grower. 40 cts. per doz., \$2.50 per 100, \$20.00 per 1000.

Solfaterre. Deep dark blue, a large blotch of deep yellow on falls; a very attractive and tall-growing variety.

Prices on all varieties listed above, except where noted, 30 cts. per doz., \$1.75 per 100, \$15.00 per 1000.

COLLECTION: 10 bulbs each of 10 varieties, 100 bulbs, \$2.50; 25 bulbs each of 10 varieties, 250 bulbs, \$5.00.

ENGLISH IRIS

These bulbous Irises form an excellent addition to the garden, blooming, as they do, after Spanish Iris. The foliage and flowers are more robust than those of the Spanish Iris. If planted in an open situation and the same simple cultural treatment given as suggested for Spanish Iris, they are sure to do well.

BLUE CELESTE. Splendid shade of pale blue.

LA RENOMME. A splendid large self purple-blue.

MISS BARKLEY. White, flaked crimson.

MONT BLANC. Pure snowy white.

PRINCE OF WALES. Deep shade of dark blue.

REGULUS. A very distinct light blue.

40 cts. per doz., \$3.00 per 100, \$28.00 per 1000.

SPANISH IRIS—(1) Solfaterre, (2) Beauty, (3) King of the Whites, (4) Cajanus

SELECTED FIRST-SIZE HYACINTHS

Any good soil will grow Hyacinths, but they do best in a rich, light one. **Selected First-Size** may be planted singly in a 5 inch pot, or bulbs of one variety to a 7- or 8 inch bulb-pan, a piece of broken pot placed across the hole in the bottom, then a layer of moss about an inch deep to provide proper drainage. Place the bulb in the pot so as to be about half an inch below the surface of the soil. Remove all the offsets from the bulb before potting, and have the soil come up to within an inch from the top of the pot to permit watering when bulbs are growing. Bulbs so potted may be plunged out in the open garden and covered with about 6 inches of gravel or ashes. This will admit of their getting the proper amount of moisture and still prevent damage by frost. See that there is a firm bed of ashes beneath the pots, so as to prevent the entrance of worms. They may also be put in a coldframe or cool cellar, and kept well watered. Should be kept out **twelve weeks**. A very frequent mistake is made in bringing the bulbs into the light too soon, resulting in a failure to bloom, or else weak spikes. After lifting, see that the temperature for the first two weeks is quite low (50 degrees) until the top-growth has nicely developed, when they may be forced according to one's needs. By keeping near to the glass so as to avoid becoming drawn, with a liberal supply of air, strong spikes of bloom may be had. **Avoid, under all circumstances, direct bottom heat.**

The figures, 1, 2, 3, 4, indicate relative time of blooming—1 being early; 4 the latest. Prepaid to your home.

SINGLE PINK, ROSE AND RED

		Each	Doz.	100
Garibaldi.	1. Deep crimson-red; large spike. Early forcer.	So.15	\$1.75	\$12.00
